EDCI/660A Final Reflective Essay

      I found module 3 most useful with the Purdue Online Writing Lab (OWL), library guides and the tutorials. I was able to research my sources with minimal frustration. I was able to answer several questions by completing the modules. How do I find the Purdue University library? How can I locate peer-reviewed resources for my annotated bibliography? How can I format my paper according to APA? I believe the Purdue Online Writing Lab (OWL) and the library guides resources in this program were particularly helpful, and I will use them in future courses. Some online learning strategies that may work for my learning would include utilizing the calendar for planning time to work on assignments and to check my student email more often.

      I believe that through the Purdue University Learning Design and Technology program, I will have obtained the knowledge and skills necessary for use as an Instructional Designer for online educational environments. I will utilize my skills and experience to develop, design, apply instructional tools, create programs, and materials to support a range of learning outcomes for students attending kindergarten through high school in an eLearning environment. I am looking forward to working for online educational corporations such as Connections Learning by Pearson for their Connections Academy schools.
